4. CPCL internship about diesell and Gas (Core)
5. Google Fundamental of Digital Marketing

ACADAMIC PROJECT

Go-kart Automobile project

Description

Well, it's not an easy question to answer, because the term "go-kart" can be used to describe various vehicles. There is some overlap between go-karts, buggies, and ride-on toys.

Wikipedia describes it as an "open-wheel car". That may be correct for racing and off-road go-karts, but it doesn't really describe pedal go-karts. These are sort of like tricycles, but they are four wheels and are go-karts for kids.

A go-kart is basically a vehicle with four wheels, that isn't an ATV. It can be powered by battery, gas, or pedal. It can be used by kids and even adults. It's also not a dune buggy.

STRENGTHS

- Hard working
- Leadership quality
- Adaptive to challenging technology
- Dedication towards work
- Quick learner
- Disciplined

PERSONAL DETAILS

DOB: 26th Jan 2000.

LANGUAGES KNOWN: English, Hindi and Tamil.
